## **GIZA DJS**

gizA djs are an eclectic DJ/production duo from Italy. gizA is an acronym of their real names Gian Pietro and Tiziano. Their collaboration began in 2005 founding the Xtreme Festival.

The gizA djs started from 0 in the field of productions, at the beginning of their career they decided not to look for shortcuts, they slowly learned the art of production, the only way to express themselves in the music. Over the years, through productions and releases for small labels, they have slowly learned and refined the techniques of production, mixing, and sound design, allowing them over the years to come to the attention of the great DJS and A&R of some of the most important labels in the underground panorama.

Over the years they have released music on some of the most important independent labels of the melodic techno and indie dance scene including Diynamic, Exploited, Selador, Glasgow Underground, Sincopat, Ritter Butzke, Eklektisch and Katermukke. In 2023 they will release on Monaberry and Trueromance and are also working on several remixes for other artists.

## **THE PROJECT**

After the first steps taken with tech-house productions, they have progressively changed their sound reaching what best represents them. Nowadays their productions are oriented between melodic techno & house and indie dance, a certain type of electronic music with retro and synth-wave nuances. Their productions are strongly inspired by the natural context of the nearby mountain areas of their hometown, Belluno, a delightful city on the edge of the national park of the Dolomites.

gizA are djs and both a live project, over the years they have had the opportunity to experiment and bring to the stage an electronic live project as well as a hybrid DJ set with some synthesizers and Ableton Live.

## **SUPPORTS AND RELEASES**

Many big names have played their tracks over the years: Solomun above all, but also artists such as Nicole Moudaber, WhoMadeWho, Pete Tong, SuperFlu, Dubfire, Konstantin Silbold, Oliver Koletzki, and Umek; arriving at being supported as well by artists belonging to different genres like Afrojack, Claptone, and Lane8.

In 2016 they gained the respect and support from Solomun that began to play their productions and finally in 2017 has offered the guys the opportunity to release their track on Diynamic Music, this release gained support also from the master Pete Tong on the legendary BBC Radio 1.

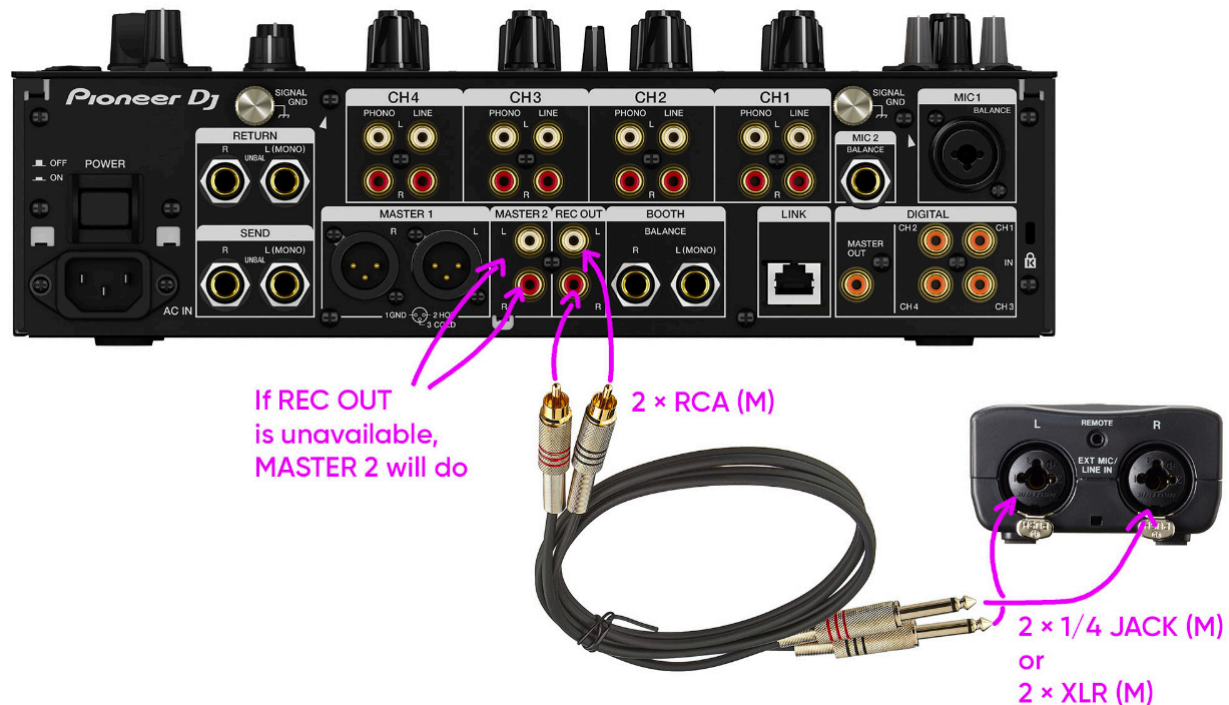

After this goal, their music arrives at the ears of great artists like HOSH, Black Coffee, Dixon, Ame, David Mayer, DJ T, Umek, Stefano Noferini, Magdalena, Dirty Doering, and naturally Solomun who during the years continued to play their productions all over the world in most of his sets. In 2020 their track Dolce, released in Diynamic, gained the top 100 on Beatport Indie Dance. Now the guys are still working on their passion: the music!

2022 was a crescendo thanks to the success achieved with their Acid Afternoon EP for Diynamic, soon becoming one of the label's best-selling EPs. They have performed on some of the most important stages in Europe including opening the MainStage at Kappa Futur Festival 2022 and guesting in the Solomun show lineup at Printworks London. They played at some exclusive parties all over Italy and they were guests of honor at the final evening of the JägerMusic Lab. Their 2022 tour continued touching European cities such as Hamburg, Riga, Lyon, and Berlin in two of the most iconic clubs of the city: Sisyphos and KitKat.
